

Vous êtes invité(e) à un webinaire agréé:

Prévention de l'exacerbation et de la mortalité de la MPOC

Même avant la pandémie de COVID, des travaux étaient nécessaires dans l'environnement canadien pour s'assurer que les conséquences néfastes des exacerbations de la MPOC puissent être réduites. La communauté médicale, ainsi que les patients, ne percevaient toujours pas la gravité des exacerbations de la MPOC, qui peuvent entraîner des conséquences négatives. Alors que nous sortons d'une période prolongée de distanciation sociale et d'isolement, et que nous recommandons à être exposés aux infections et à d'autres facteurs aggravants, l'augmentation des exacerbations chez les personnes atteintes de MPOC est préoccupante.

Rejoignez nos experts dans ce webinaire GRATUIT de 60 minutes et apprenez-en plus sur ce que vous pouvez faire pour réduire les effets néfastes des exacerbations de MPOC (signalées ou non) qui peuvent entraîner une morbidité et un décès.

Objectifs d'apprentissage :

Après ce webinaire, vous serez en mesure de :

- Reconnaître l'occasion manquée de poser un diagnostic de MPOC
- Proposer un traitement efficace aux patients présentant un "événement de type exacerbation"
- Comprendre les défis auxquels les patients sont confrontés, spécifiques à une exacerbation de la MPOC
- Discuter de l'importance de la mortalité dans la MPOC, en particulier en tant que complication des exacerbations de la MPOC
- Cibler "le bon patient pour le bon traitement" afin de réduire la morbidité et la mortalité
- Savoir comment optimiser le traitement pharmacologique en s'appuyant sur le programme "Mieux vivre avec la MPOC" et l'utilisation du plan d'action écrit.

Nos conférenciers :

Dr Jean Bourbeau
MD, MSc, FRCPC

Dr Jacques Bouchard
MD, CCMF

Nous vous invitons à soumettre vos questions à l'avance afin qu'elles puissent être répondues pendant le webinaire : livingwellwithcopd@gmail.com

Cet événement est une activité d'apprentissage de groupe agréé (section 1) telle que définie par le programme de maintien du certificat (MOC) du Collège royal des médecins et chirurgiens du Canada, et approuvée par la Société canadienne de thoracologie. Vous pouvez réclamer un maximum de 1.0 heure (les crédits sont calculés automatiquement).

Ce programme est co-développé par la Société canadienne de thoracologie, RESPIPLUS™ et AstraZeneca et est prévu pour atteindre l'intégrité, l'objectivité et l'équilibre scientifiques.

You are invited to an accredited webinar:

Prevention of COPD Exacerbation and Mortality

Even prior to the COVID pandemic, work was required in the Canadian environment to ensure that the harmful consequences of COPD exacerbations could be reduced. The medical community, as well as patients, still failed to perceive the gravity of COPD exacerbations, which can result in negative outcomes, including morbidity and death. As we now come out of a period of prolonged social distancing and isolation, and start to be exposed to infections and other aggravating factors again, there is a concern regarding the surge in exacerbations for people with COPD.

Join our experts in this FREE 60-minute webinar and learn more about what you can do help reduce the harmful effects of COPD exacerbations (reported and unreported) that can result in morbidity and death.

Learning Objectives:

After this webinar you will be able to:

- Recognize the missed opportunity of making a diagnosis of COPD
- Offer an effective treatment for patients presenting with an "exacerbation like event"
- Understand the challenges the patients face, specific to an exacerbation of COPD
- Discuss the importance of mortality in COPD, in particular as a complication of COPD exacerbations
- Target "the right patient for the right treatment" in order to reduce morbidity and mortality
- Know how to optimize the pharmacological therapy linking to "Living Well with COPD program" and the use of the written action plan.

Our Speakers:

Dr. Peter Lin
MD, CCFP

Dr. Joshua Wald
MD, FRCPC

Dr. Lisa Mielniczuk
MSc, MD, FRCPC
